Director, Pepal**

pepal

Pepal's Model

Shared Vision 

CONNECT

Bring together global corporations, governments and NGOs to collaborate and achieve mutual benefit.

DEVELOP LEADERS

Design and deliver transformational online or in-person programmes aimed at sustainably strengthening leaders who can drive change.

INNOVATE

Generate and pilot practical solutions which have the potential for scale and positively impact the most vulnerable people in the world.

CREATE SOCIAL IMPACT

INJIA's Vision

To reduce rates of cervical cancer in India, Tanzania and Uganda through powering the human potential of the healthcare ecosystem.

NJIA is a collaboration

NJIA hypothesis

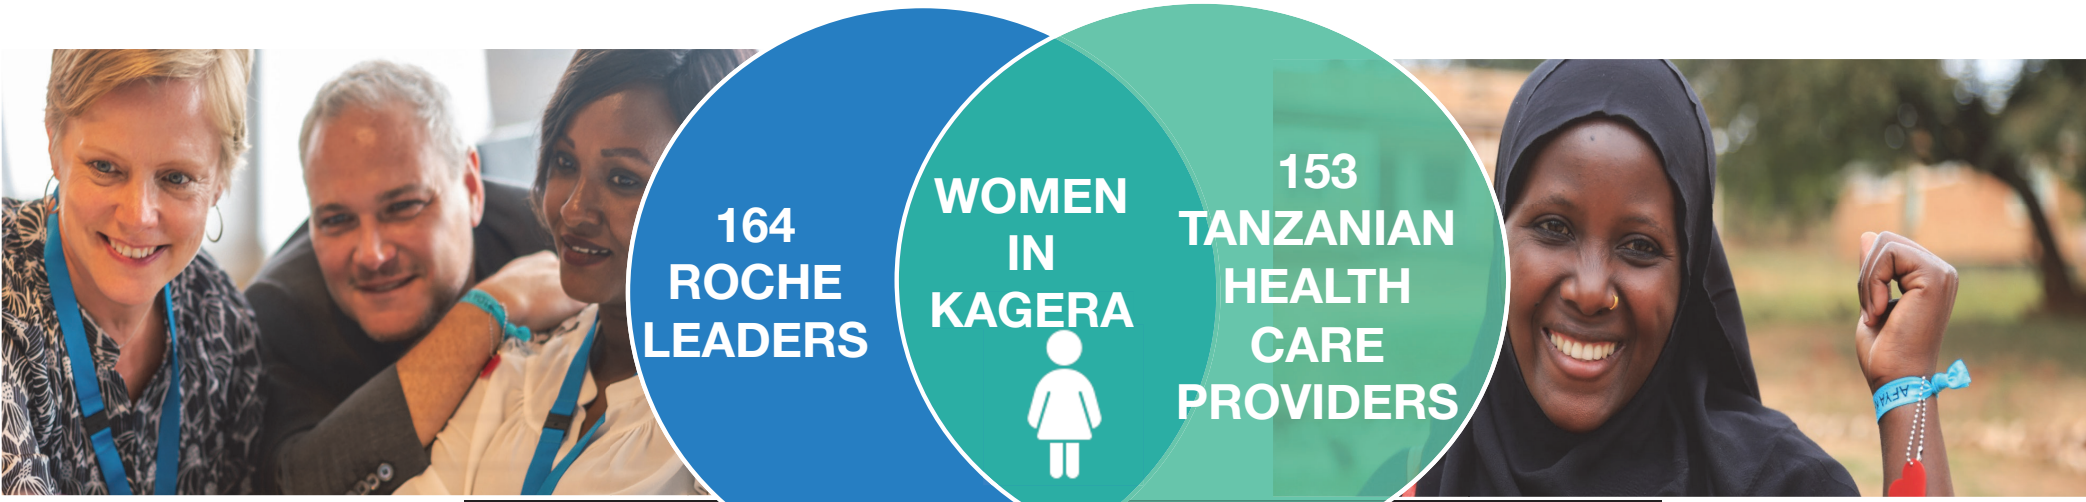

Can we impact healthcare simply by empowering leaders to close leadership & governance gaps?

Do better leaders save more lives?

And in return, can participation in this program help transform Roche's leadership?

Overview

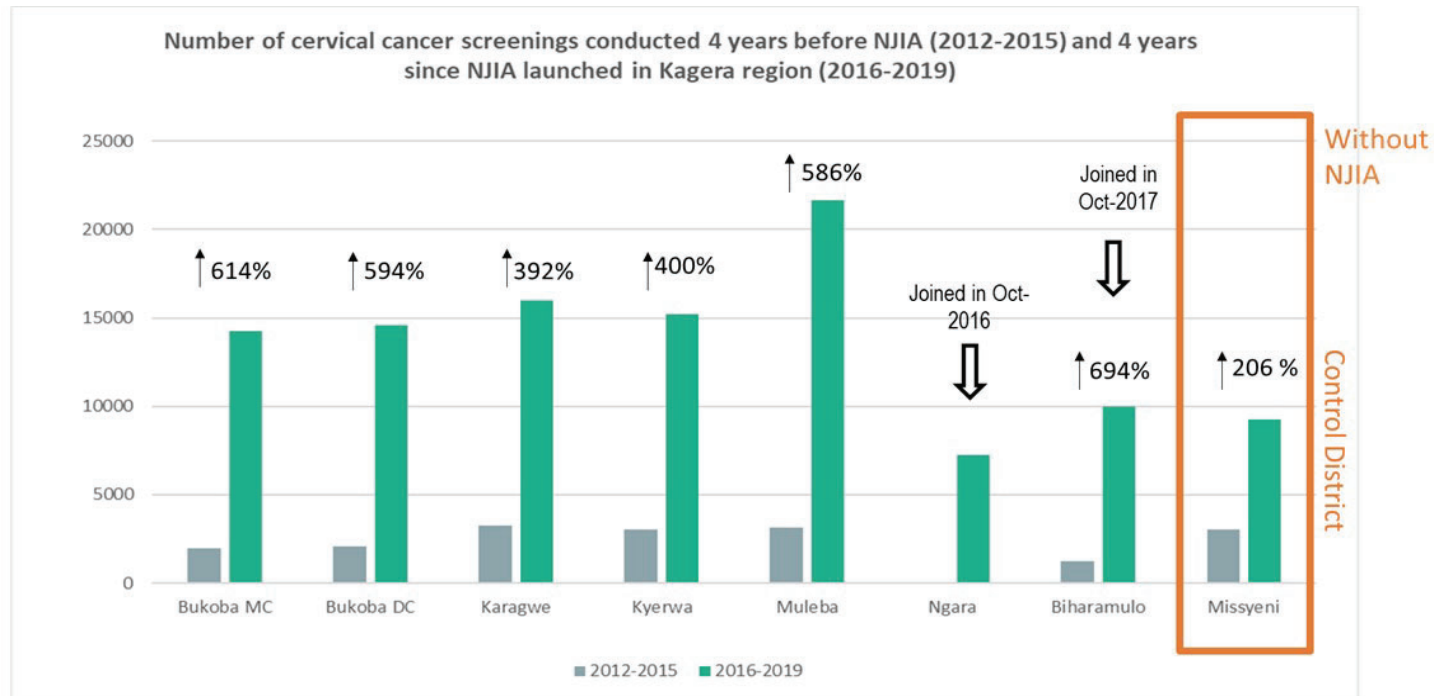

**Grow agile
mindset &
behaviour**

**Grow leadership
skills**

Learn from each other and strengthen government-led cervical cancer initiatives
Increase access to cervical cancer prevention
Strengthen healthcare systems

NJIA Impact

519%

Districts with Tanzanian Healthcare Leaders who have been through NJIA have seen a significant increase in the number of women screened since the launch of NJIA in 2015 (on average 519%).

This is in comparison to a control district in the same with the same external partners and government programs (on average 206%).
