TogetHER for Health Cervical Cancer Grants Program

- Small, highly-targeted grants to strengthen adoption of cervical cancer primary and secondary prevention technologies
- Generate evidence to speed access and uptake of these new technologies
- 2 awards of \$25,000 USD awarded for 1-year programs
- Highly competitive call for proposals: 26 applicants from across 20 countries
- Grants submitted: HPV vaccination, enhanced visual assessment during screening, self-sampling, and loop electrosurgical procedures.

2019-2020 Grantees

Botswana

- Jphiego introduces thermal ablation at 4 high-volume health facilities in Gabarone district.
- Feasibility and acceptability of thermal ablation treatment among health providers and their clients.
- Inform national efforts for integration/expansion of thermal ablation throughout Botswana.

2019-2020 Grantees

Nicaragua

- MoviCancer Foundation implements thermal ablation in 3 regions of the country, evaluating the procedure's impact on treatment, as well as its feasibility and acceptability among providers and clients.
- Training guidelines/protocols for the use of thermal ablation, and advocacy activities to support national adoption.

Results:

- 10 health providers trained and equipped with thermal ablation devices
- 25,000 eligible women treated for pre-cancerous lesions
