World Cancer Day webinar:
**Automated Evaluation of
Cervical Images to Detect Cancer**

Monday, February 4, 2019
10-11:00 AM US Pacific Time/1-2:00 PM US Eastern Time

Please join from your computer, tablet or smartphone.
<https://global.gotomeeting.com/join/962441781>

Cervical cancer is the fourth most common cancer in women globally and is the leading form of deadly cancer in women in low-income settings.

Please join TogetHER for Health and Global Good for a webinar discussion and Q&A about the potential of Automated Visual Evaluation (AVE) to greatly improve screening for cervical cancer, particularly in low-resource settings.

Learn about a groundbreaking new study by Global Good, the National Cancer Institute and the National Library of Medicine that found AVE can visually recognize cervical pre-cancerous lesions better than a human expert:

Speakers:

- Ben Wilson, Director, Center for Intelligent Devices, Intellectual Ventures Lab
- Mark Schiffman, MD, MPH, Senior Investigator, National Cancer Institute
- Celina Schocken, Executive Director, TogetHER for Health
- Noni Gachuhi, Women's Health Lead, Global Health Technologies, Global Good

Join the webinar from your computer, tablet or smartphone: <https://global.gotomeeting.com/join/962441781>

First GoToMeeting? Let's do a quick system check:
<https://link.gotomeeting.com/system-check>

You can also dial in using your phone:
United States (Toll Free): 1 866 899 4679
United States: +1 (646) 749-3117
Access Code: 962-441-781

Please note that call participation is limited to 150 participants. A recording of the event will be made available for those unable to join the call due to the volume of participants in the live webinar. The event organizers strongly encourage participants to join by computer, tablet or smartphone as we will only be taking questions via chat. *The chat function is not available for those dialing in using a phone.*
